Course content

This course provides knowledge and skills in solving simple language and speech technology problems by constructing programs in a contemporary programming language.

Learning outcomes

In order to pass the course, students are expected to be able to:

- solve simple language and speech technology problems by constructing programs in a contemporary programming language,
- apply and describe the rules of good programming style, including documentation, error handling, structuring, and flexibility,
- understand, troubleshoot and modify specific programs,
- use modern tools to write and handle programming code,
- use external libraries for contemporary language and speech technology applications.

Required reading

The main course book is:

- Charles Severance. 2024. *Python for Everybody*. Available online: <https://www.py4e.com/>

In addition, we will make extensive use of parts of the following:

- The Python Standard Library. Available online: <https://docs.python.org/3/library/index.html>
- The Python Tutorial. Available online: <https://docs.python.org/3/tutorial/index.html>

Additional reading of at most 100 pages may be handed out by the teachers during the course.

G. Grades

Three parts in the course

1. Introduction to Unix/Linux (this week)
2. Basic Python
 - Lectures
 - Pen and paper exercises
 - Book
 - Programming exercises
 - **Exam**
3. **Four mandatory lab assignments**

Course overview	Week		Note: always check the schedule on TimeEdit!
Introduction to Linux	36	Monday	In case of changes, this document may be outdated, but the TimeEdit schedule should always be current.
Introduction to Linux	36	Wednesday	
Starting Python	37	Monday	
Starting Python (variables, types and statements)	37	Wednesday	
Functions & Conditionals	38	Monday	
Strings	38	Wednesday	
Lists, tuples and iteration	39	Monday	
Dictionaries and sets	39	Wednesday	
Version management. Intro to lab 1	40	Monday	
Files and list comprehensions	40	Wednesday	
Recap, example exam	41	Monday	Deadline lab 1 October 5
Recap, Intro to lab 2	41	Wednesday	
WRITTEN EXAM	42	Monday	Deadline lab 2 October 14
Intro lab 3, Object-oriented programming and classes	42	Wednesday	
Regular expressions	43	Monday	Presentation/Deadline lab 3 October 21
Intro lab 4	43	Wednesday	
	44	Monday	Presentation lab 3 Deadline lab 4 October 28
	44	Wednesday	
WRITTEN EXAM re-take	46	Tuesday

F. Schedule

G. Grades

- To pass this course, you need to **both**:
 - 1 pass the exam
 - 2 pass **all** four lab assignments
- The course is graded on a scale from A (best) to F (failed)
- The exam is graded as pass/fail
- Each lab assignment is graded as failed or passed with/without distinction
- The number of “pass with distinction” determines your grade:

#distinctions	grade
0	E
1	D
2	C
3	B
4	A
